

## Oaklands Interchange

**Client** TransAdelaide & Department for Transport, Energy and Infrastructure  
**Site** Across Adelaide  
**Budget** \$ 9 million  
**Description** Oaklands Interchange is an iconic project announced as part of the State Government's Infrastructure Plan. The Interchange will provide state-of-the-art facilities for passengers travelling to and through this key regional centre. Phoenix was appointed project manager for this project completed in 2008.

## Salisbury Interchange Upgrade

**Client** TransAdelaide  
**Site** Salisbury  
**Budget** \$ 0.8 million  
**Description** Project scope was to extend the existing platform including associated platform furniture, signage and lighting as well as full disability access upgrade for the interchange. Managed initial concept definition with internal stakeholders through concept and final design. Developed specification and contract documentation.

## Cold Warehouse Enlargement

**Client** SENOBLE  
**Site** Toledo – Spain.  
**Budget** \$ 2.4 million  
**Description** The scope of this project was to manage the project from the concept, ensuring stakeholders engagement, coordinate civil, mechanical and electrical engineers, through getting the financial approval to manage contractors, including management and facilitate engagement between Client, contractors and suppliers, in order to integrate the new storage without interrupting the normal operation of the existing one, to commissioning, final handover and closeout.

## South Terrace Amenities

**Client** TransAdelaide  
**Site** Adelaide  
**Budget** \$ 0.5 million  
**Description** The project will provide an amenities area in South Terrace for Tram staff. It will involve the coordination of a number of staged work packages, managed initial concept definition through engineering and final design, financial control, construction management and final works for closing out.

## IKEA Mall Electrical & Mechanical Refurbishment

**Client** IKEA  
**Site** Malaga. Spain  
**Budget** \$ 6.5 k  
**Description** The upgrade of existing IKEA Mall due to the need of the storage enlargement supposed a challenge to coordinate and work inside of the mall during non-open hours in order to not disturb the normal sale-operation of the mall. The scope included management of the design, evaluation of tenders and, during the installation, the coordination of the electrician and mechanic suppliers with the crew working in the storage and schedule and cost control.

## Fire Truck Sheds

**Client** SA Water  
**Site** Murray Bridge - SA  
**Budget** \$ 2 million  
**Description** The scope of this project is to upgrade, improve & replace the existing fire detection & control systems in line with industry standards best practices, reducing the risk of personal injury or OHS incidents and the risk to damage or loss of critical major system assets and improve system reliability, managing and developing the project works and concept design, prepare the Business Case and gain full Financial Approval.

## Adelaide Desalination Plant

**Client** SA Water  
**Site** Port Stanvac  
**Budget** \$ 1.8 billion  
**Description** Reviewed Architectural design, specifications, materials and equipment in accordance with the Building Code of Australia. Liaised meetings with the client's Architect and the contractor's Architect to raise and resolve any issues. Managed other design queries by acting as the interface between the contractor's design team and the client's design review team. Identified and controlled potential hazards in workplace through hazard identification and risk analysis by complying SafeWork South Australia policy and standards. Carried out a final inspection for building handover to commissioning by coordinating design, construction & procurement team and reviewing defect closure/progress.
