

SA Water Master Planning

Client SA Water
Site Adelaide
Budget \$ 5.8 million
Description The SAW Water Master Planning project commenced in 2002 with the aim of completing a 25yr assessment of the likely demands on the SAW water supply & wastewater assets, and the augmentation and upgrade requirements to meet such demands. The project consisted of a state-wide investigation and the development of Master Plans & Long Term Plans.

SA Water Panel Contracts

Client SAW Water
Site Adelaide
Budget \$ 25 K
Description Develop contract documentation, procurement plan and evaluation plans. Facilitate tender evaluation and approvals process. Phoenix project team meetings were used to keep up to date with feedback and improve service delivery during project. Lessons learned log was kept during project delivery. Client feedback was sought via survey on completion.

Maintenance Panel Contracts

Client TransAdelaide
Site Adelaide
Budget \$ 8.5 million
Description Development of Panel Contract documentation for TransAdelaide for Track and Civil Maintenance works. Engaged with internal stakeholders to develop technical schedules for contract documentation. Establish commercial arrangements – this was the first Standing Offer Panel arrangements undertaken by TransAdelaide. Develop contract documentation based on Client format.

Supply Demand Planning

Client SA Water
Site Adelaide
Budget \$ 0.25 million
Description Development of an End User Model for SA Water Systems Planning Service. Project Management and Contract Management Systems and processes were used in compliance with SA Water CPMM, close out report, lessons learnt, contractors review.
